

## Solar Pumping Inverters

### Description:

BPDXKXTN series solar water-pump inverter adopts the dynamic VI MPPT technology and motor control technology, and is suitable for AC water pumps with prompt response, high efficiency and stable performance.

### Features

- Support direct driving single-phase motor (don't tear down Start Capacitor), and three-phase 220V motor.
- One pump inverter can work with multiple motors, support vector control.
- Protection class IP65 and fanless system design, with convenient installation, maintenance free.
- With a bypass function, support 220V Utility Power input and diesel engine input; optional water level detection module and diesel engine start/stop module.
- Low start voltage and wide input voltage range give more possibilities for accepting multi PV strings configuration and different type of PV module.
- Digital intelligent control, Flexible adjusting and setting pump's speed range. In addition to soft start function also can provide lightning protection, overvoltage, over current, overload protection function etc.

Output voltage (Vac)			0~Input voltage			
Output connect method			1P2L/3P3L			
Output frequency (Hz)			1~400			
<b>Performance</b>						
Control mode			Motor control technology			
Type of motor			asynchronous machine			
<b>Other Parameter</b>						
Dimension (H x W x D mm)			280×300×130			
Weight (kg)			≤10.5			
Protection			IP65			
Cooling			Natural Cooling			
HMI			LED screen extend ( not support LCD screen )			
<b>communication</b>						
external communication			RS485/Single Digital Input/Analog Input (0~10V)			
<b>Certifications</b>						
Certification			CE ; IEC61800-3 C3			
<b>Working environment</b>						
Ambient temperature			(-25°C ~ 60°C More than 45 °C derating)			
Working altitude			3000m ( more than 2000m derating )			
Design life			5 years (warranty 18 months)			
<b>Recommended solar array configuration</b>
